

COMMUNITY HEALTH NEEDS ASSESSMENT TOP HEALTH PRIORITIES

- 1 Increase % of adults treated for diabetes
- 2 Reduce % of obese adults through education and care
- 3 Increase % of people who can access services at safety-net clinics

COLLABORATION EXAMPLE

"The Sedgwick County Health Navigator's Program choose Guadalupe Clinic as a partner. This program reaches out to community members to speak to them about their health care needs. Many individuals that do not have insurance, Medicaid, or Medicare are referred to our clinic by the Navigator Program."

CARE COORDINATION & PATIENT-CENTERED MEDICAL CARE

"Guadalupe Clinic offers a variety of options for care coordination. Our nurses see each patient first, and then our patient is seen by a physician or physician's assistant. If the physician believes this patient needs additional services, he/she refers the patient to another physician or special-ty physician, physical therapist, or counselor."

ADDRESSING COMMUNITY HEALTH PRIORITIES

"Guadalupe Clinic is providing preventative health care. Each patient is seen by a provider. Referrals are made as needed to our specialty physicians, physical therapists, chiropractor, and behavioral health counselor. Patients are also provided with education materials (in English or Spanish), and additional follow-up visits are scheduled."

COMMUNITY PARTNERSHIPS

HOSPITALS "refer patients to the clinic... donate lab imaging services... resident physicians volunteer at the clinic..."

HEALTH DEPARTMENT "partner on infectious diseases... provide vaccines during sports physicals... referrals... provide data."

MENTAL HEALTH CENTER "refer and accept referrals... clinic offers counseling one day a week..."

PRIVATE PRACTICES "meet monthly with other clinics... physicians and nurses from private practices volunteer at clinic..."

OTHER "private businesses and faith-based groups..."

USING GRANT FUNDS TO IMPROVE PATIENT CARE

"Grant funds from the Community-Based Primary Care Clinic Grant Program will be used to help offset medical staff salaries, volunteer coordinator salaries, utility costs, and medication costs. Since we are a free clinic and do not accept Medicaid, Medicare, or insurance payments, we rely upon the generosity of donors, grantors, and businesses to help meet our expenses."
